GLOSSARY ..... 6

## Section 204 Cash Out Analysis

### Requirements

You must:

- examine the risk of allowing cash out to the Borrower (see [Form 4660](#) for a description of cash out transactions); and
- for New Construction, consider the Mortgage Loan amount relative to the Property's total development cost basis.

### Guidance

When underwriting a cash out transaction you should consider:

- the amount of hard equity remaining in the Property, excluding prior permanent financing costs, such as interest or prepayment premium;
- the length of time the Borrower has owned the Property;
- the Property's effective age and current physical condition;
- any improvement in asset quality over the ownership period;
- any improvement in the Property's operations (i.e., its NCF) or value over the ownership period;
- if the Property's value increased due to an increase in NCF, rather than a decrease in the capitalization rate; and
- for New Construction, the Property's total development costs basis:
