☑ Requirements

For a Green Rewards Mortgage Loan Property to be eligible, you must ensure:

- the Property has at least 12 months of Stabilized Residential Occupancy;
- the Borrower selects Efficiency Measures from the HPB Module or HPB Report projected to result in an annual reduction for the whole Property of at least 30% in combined energy and/or water consumption of which at least 15% must be attributable to savings in energy consumption; and
- for a Manufactured Housing Community,
  - the 15% energy consumption savings is achieved only through the installation of a Solar PV System or other renewable energy system,
  - all Efficiency Measures, including the Solar PV System, are made only to Borrower-owned property,
  - electricity is metered at the whole Property level (master-metered) by the utility to the Property owner (even if reimbursed by the tenants), and

Energy consumption savings may represent reductions in whole-Property consumption of energy supplied by utilities or energy suppliers (including delivered energy such as fuel oil or propane) compared to the previous 12-month baseline through a combination of the installation of an onsite renewable energy system and energy efficiency measures.
