## **Section 204**      Calculation of Interest Due

---

### **204.01**    Generally

Generally the Borrower's monthly payment consists of P&I and deposits for insurance, taxes, replacement reserves and replacement hedges or some combination of such items. In some instances, the payment may include additional funds to be applied toward the UPB or to repay funds advanced by the Servicer. The Servicer must account for each portion of the Borrower's monthly payment in the Servicer's records. The Servicer must track both actual and scheduled Mortgage Loan balances (a.k.a., Security Pool and Security balances) and reconcile any outstanding difference (e.g., the Servicer advances for insufficient Borrower payments).

### **204.02**    Calculating Interest Due

The interest calculation method is generally specified in the Loan Documents. Servicers are required to calculate interest due for each Mortgage Loan as required by the Loan Documents. If the Loan Documents do not contain any information regarding the interest calculation method, then Servicers should assume a 30/360 accrual method.

#### **204.02A**    Actual/360 Interest Calculation Method

Interest will accrue based upon the actual number of days in a calendar month and a 360-day year.

#### **204.02B**    30/360 Interest Calculation Method

Interest will accrue based upon a 30-day month and a 360-day year.

## Glossary

### B

**Borrower** Person who is the obligor per the Note.

**Synonyms**

- Borrowers
- Borrower's
